Commenti specifici

 The company is not included in any compliance-related watch lists or sanction lists.

 Some supporting documents were considered too outdated to be included in this assessment.

 While the rated company has many actions in place relating to environmental issues, no formal certification of its environmental management system has been obtained (i.e. no certificate provided or verified).

 Since the last assessment, the overall score has increased thanks to the implementation of additional measures.

 Despite the company implementing measures regarding sustainable procurement issues, policies are not formalized or are only basic.

 There is a lack of reporting on KPIs regarding ethics issues.
